Mike, the 12th it is, thank you for getting right back to me.

In regards to the report, we are talking to Scott Stout of Newfields today, and will see what we can do to expedite getting you the results.

Tom-
I would prefer the 12th. I will let you know who from EPA will be attending.
As for your report, you initially indicated you would have it to me before this week, because this week is when you had originally planned the meeting. This tells me that you had the resources to have it completed last week. You then said you would have it to me by the end of this week. I do not find it appropriate for it to be delayed any further and for you to deliver it any later than the end of this week. Please let me know if you have any questions.

Subject: Proposed meeting with USEPA at the Jackson Street offices

Mike, I am scheduling our folks to come up for a presentation at your offices in regards to an update on our efforts at 001, and the planned course of action to eliminate the oil sheen in the sewer. At that meeting we will have Tim Vansumeren and Carey Mathias from our Cleveland Corporate office, Gary Amendola from Amendola Engineering, Tim Sullivan - USS Tin Mill Environmental Manager, and Joe Hanning - Manager of Environmental for USS Gary Works and the Tin Mill.

The first dates that appear to work for all involved are July 10th, or July 12th (Monday or Wednesday). Would either of those two dates work for your folks? We intend to come up to Jackson Street, and suggest either late morning, or early afternoon on one of those two days.

In regards to the sampling done to date for the CTP and outfall 001, our subconsultant NewFields is currently analyzing the results and we can provide a summary to you of what they found by the middle of next week so you will have it in advance of the meeting.

Of the attendees noted above, none are lawyers. Can you tell us who from USEPA will be at the meeting? Sean, your folks are certainly welcome to also attend.
